

## 2024 United Nation Model Programme

### “True Cost of Food Security”

FAO is working with Luiss to organize and conduct a simulation of a UN Model programme based on a FAO Council protocol. The students/delegates will debate and formulate a position to address global agrifood systems’ hidden costs, contributing to climate change, ecosystem damage, the continued poverty of workers in agrifood systems and the occurrence of food-related health issues. This implies that the students/delegates have a basic knowledge of:

- International environmental law
- FAO’s history and programme of work
- The concept of agrifood systems and the role of the youth
- Environment and sustainability, the possible impact of innovation on food security, and the protection of natural resource
