

# *Find Your Star*

## **Student Digital Challenge**

### **JANUARY 12th and 13th**

*Brought to you by the **Italian Pavilion***

How to build your global value network while promoting social and environmental sustainability in digital ecosystems?

Seize this **Open Source INTelligence (OSINT)** experience for future decision makers, and learn how to leverage Artificial Intelligence to quickly collect, integrate and analyze dynamic heterogeneous data flows. The decision intelligence process and platforms transform data into knowledge and foresights, leading to enhanced **decision-making skills**.

The objective of the **Find Your Star digital challenge** is to introduce students to the potential and basic functioning of the Digital OSINT with a view to enabling them to leverage this technology as a means to enhance and transform their decision-making processes.

In particular, students will work in small teams to reveal facts and relationships about a well-known public person (the star) for a 30-minute duration, seeking information on the internet with both common and professional tools.

All teams will be supported by a group of Instructors who will observe and guide the teams' activities by explaining the functioning of the tools and providing useful tips during the contest (both on site and remotely).

*\*The event is organised in collaboration with Luiss Guido Carli University, Elettronica and Cy4gate as part of the event entitled "Cyber Intelligence: Data Driven Decision Making for sustainable global value network - Expo 2020 Dubai" taking place at the Italy Pavilion at Expo 2020 Dubai on Wednesday 12 and Thursday 13 January 2022.*

**Venue**            **Accademia - Italy Pavilion**
